

Rocket trail pack documentation

How to customize the effect.

1-Rocket trail small.

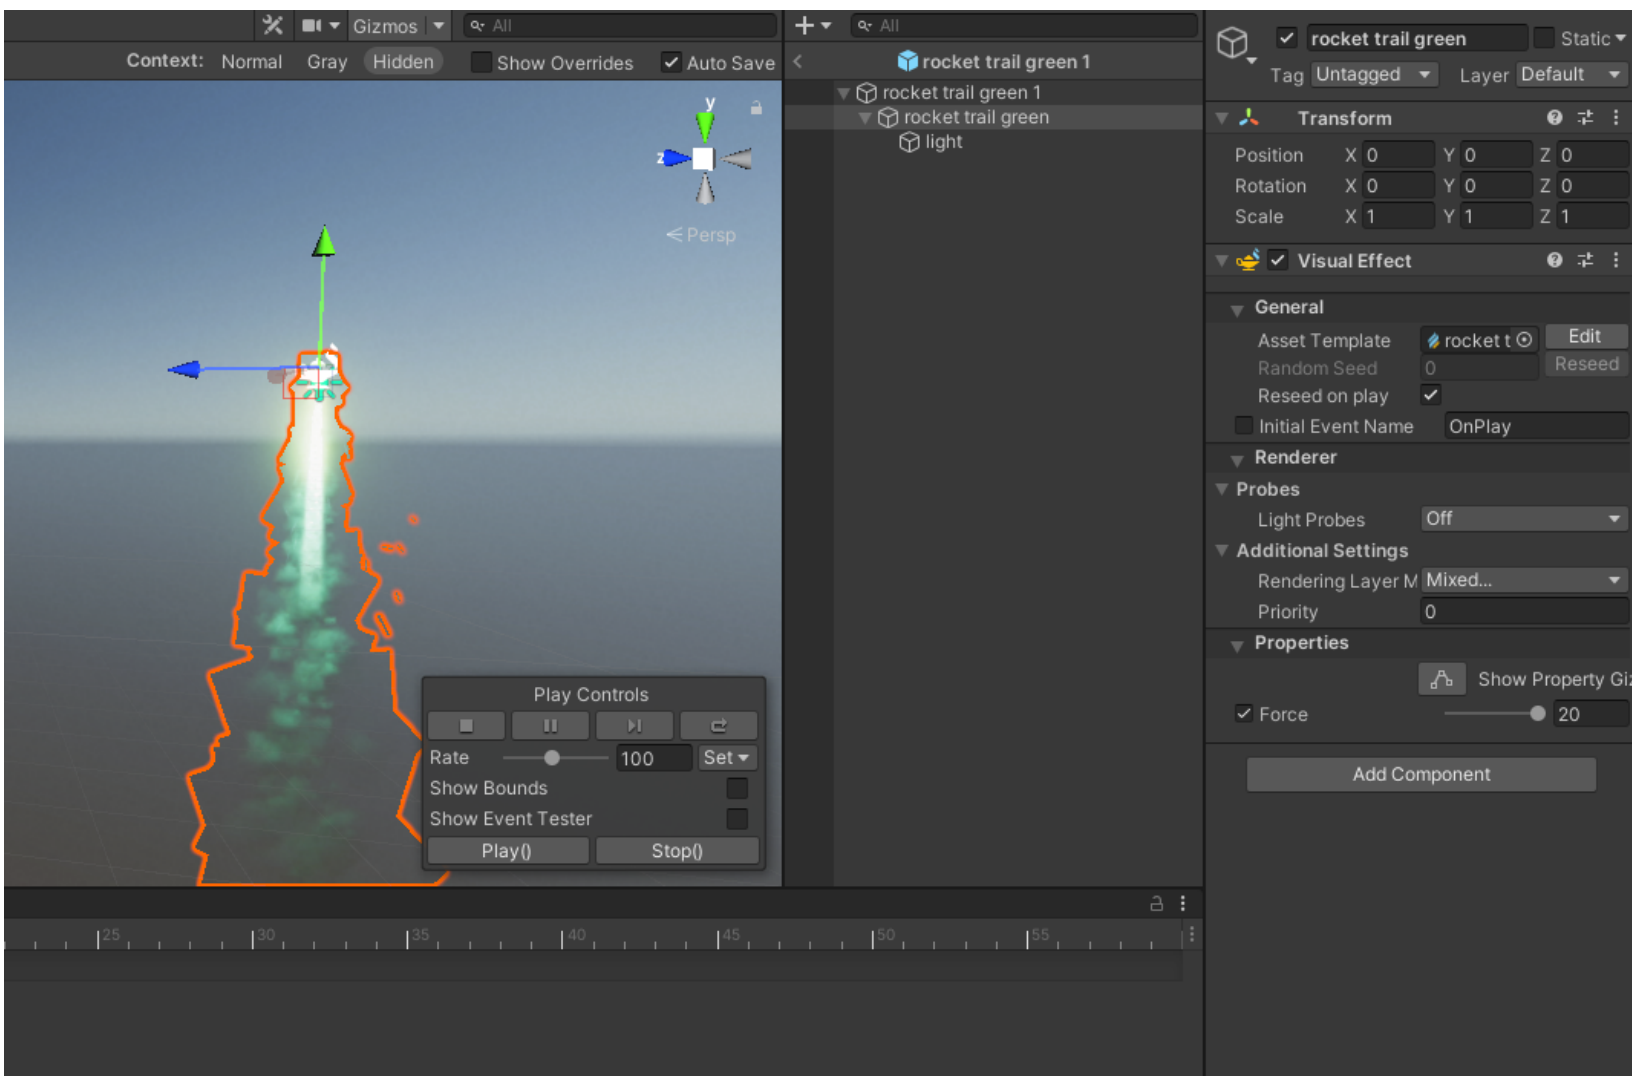

You have two parameters here, use it and you can change the shape and color of the effect.

You have three parameters here.

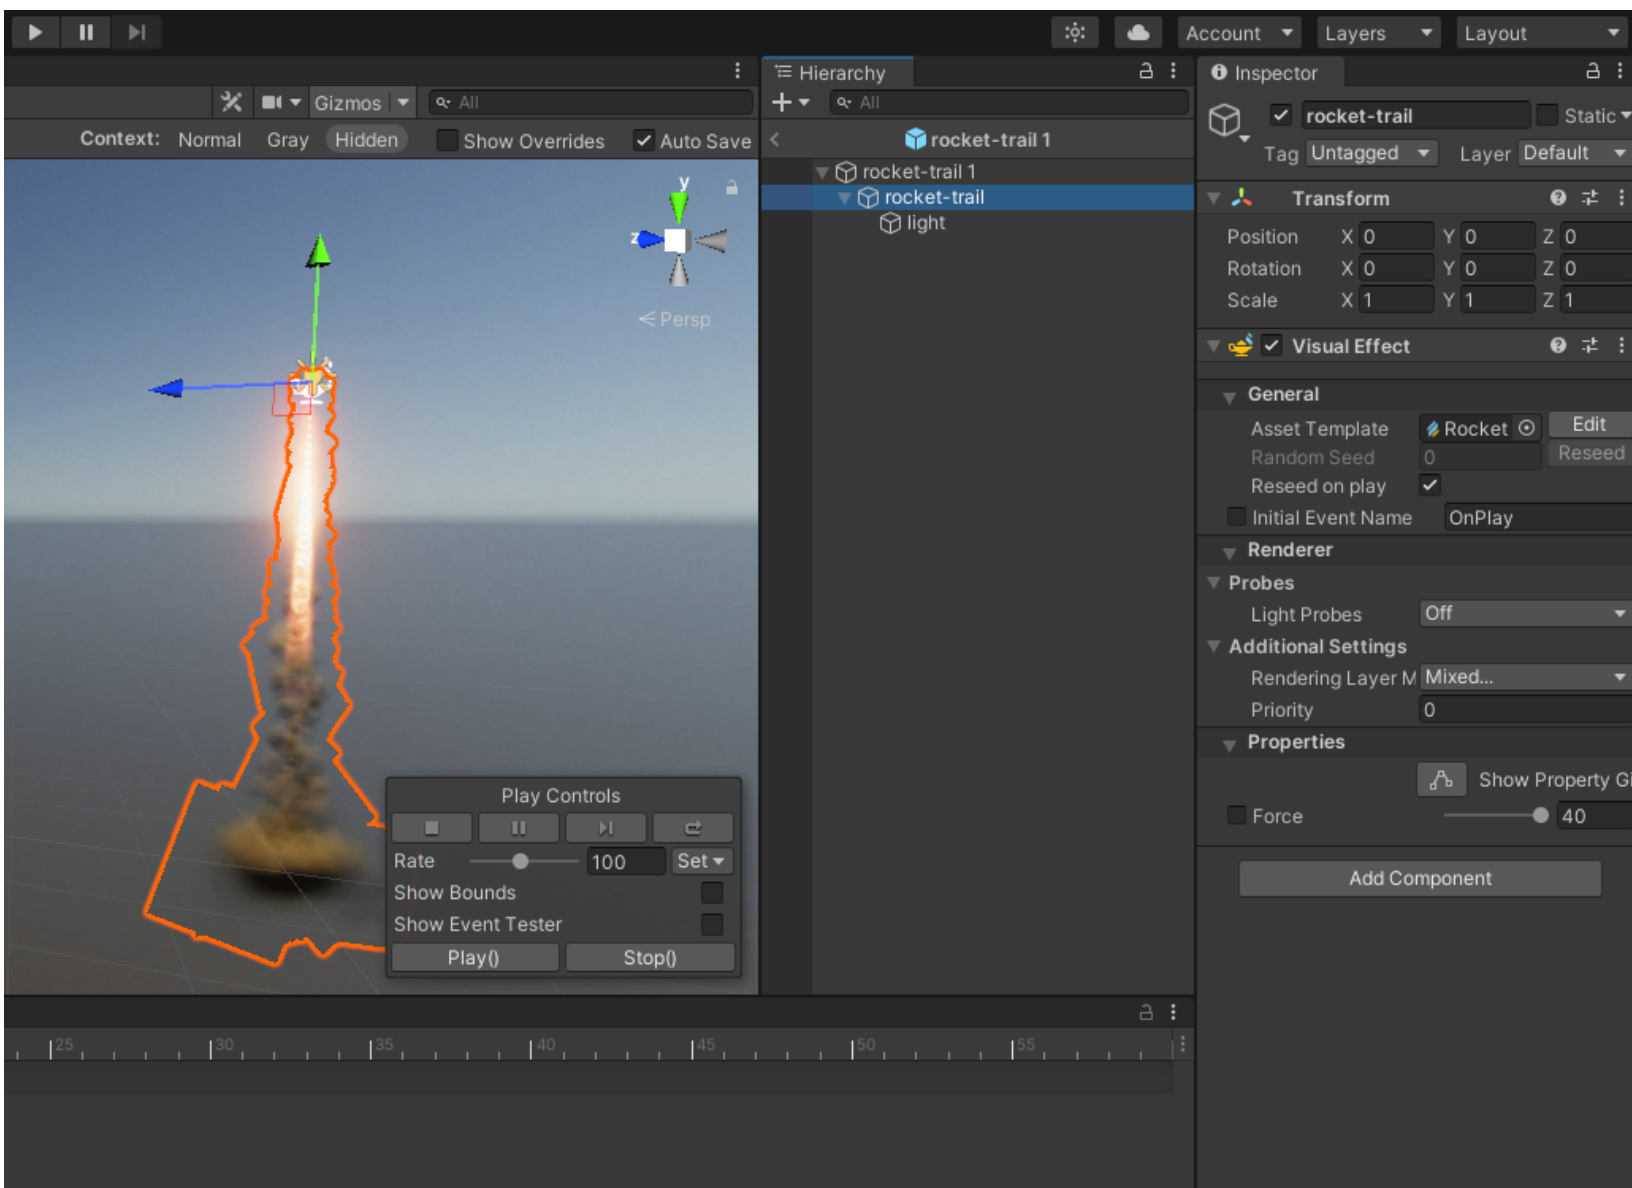

- Force: the force of the effect, which can control the shape of the effect.
- Trail color: control the color of the effect.
- Roll Speed: control the rotation speed of the effect.

Rocket trail green

Like those effects above, you have force to control the shape of this effect.

Rocket trail normal.

Like the one above, you have force too.

Goodluck with your project. My friend.
